

Impact® Pro Industrial

Designed for protection and comfort.

Honeywell is pleased to announce the new and improved Howard Leight™ Impact® Pro Industrial earmuff. With a NRR of 30, making it the highest passive NRR in electronic earmuffs on the market, the Impact Pro Industrial is built to protect worker’s hearing while allowing them to have environmental awareness.

The Impact Pro Industrial has strategically placed directional stereo microphones to amplify ambient sounds, including alarms/warning, signals, and conversations while suppressing loud, impact noises down to a safe level of 82dB. Both features work together to provide a seamless user experience. The Impact Pro Industrial capabilities are extremely valuable for workers who require impact noise suppression but is also helpful for hearing impaired workers.

Workers will also wear an earmuff that provides both comfort and protection. The newly designed “textile” headband with extra cushion offers all day comfort. The all-in-one button allows the user to control the volume and turn the earmuff on and off. The Impact Pro Industrial also has audio jack connection capabilities to pair up with a personal listening device.

NRR
30 dB
Canada
Class A(L)

FEATURES & BENEFITS

- Noise suppression of loud, impact noises down to a safe level of 82dB (noise suppression- not muting)
 - More comfortable padded headband
 - All-in-one up up and down, on/off and volume control
 - Sound amplification allows wearers to hear important communication – alarms/ warning signals, co-workers’ voices
- Directionally placed stereo microphones amplify and enhance sound for more natural hearing
 - Non-deforming outer headband withstands rough treatment in the toughest workplaces
 - Quick-Click height adjustment remains fixed during wear
- Snap-in ear cushions make replacement quick
 - Features 3.5mm audio jack and cable for connection to personal listening devices
